Iga Vegetable Farm Corp.

TOKYO NUTRITION FOR GROWTH SUMMIT 2021
Food, Health, & Prosperity for All

Beyond the Divide - FVC bridging across Local & Global

We contribute to organize diverse & sustainable food vale chain (FCV) in various local conditions in the world, by sharing the experience and knowledge obtained through establishing local organic vegetable production & distribution model in rural area in Japan.
To sustain local food system, reinforcing intra-regional distribution system by introducing scientific & environmentally friendly production technology as well as information sharing technology throughout value chains.

＜Goal・Action＞

① **Scientific knowledge database for organic food value chain**

Provide easy-to-understand contents on natural mechanism (biology, soil etc) as well as technical info. ready to use for local farmers & distributors

② **Information sharing infrastructure to support local FVC**

Promote distribution of local & organic product via public market etc. by networking local producers and sharing logistic&market data with DX tech

③ **Sharing knowledge for sustainable FVC in developing countries**

Propose integrated FVC for school lunch prgm etc. by connecting local producers & logistic entity, in collaboration with enterprises, Gov't, FAO etc.
