

XIV Processed Agricultural and Fishery Products

Explanation

This part contains statistics on production of processed agricultural and fishery products.

Brief explanations for respective statistics are as follows:

1 Production of processed agricultural and livestock products

Until F.Y.2002, statistics on the processing of wheat and barley were based on surveys by the Agricultural Production Bureau of MAFF. Since F.Y.2003, they are based on surveys by the All Japan Flour Milling Association and the ZENBAKUREN.

Statistics on crude tea production (including self-consumption) are based on the results of the "Survey of Tea Production" as regularly conducted by the Statistics Department of MAFF.

Crude tea productions in 2011 exclude waste crude tea due to voluntary restraint or shipment restriction in the target prefectures in which the shipment of tea is restricted under the Act on Special Measures Concerning Nuclear Emergency Preparedness.

In the target prefectures in which the shipment of tea is not restricted under the Act on Special Measures Concerning Nuclear Emergency Preparedness, crude tea productions exclude recalled or waste crude tea resulting from the detection of radioactive materials that were above the provisional control value under the Food Sanitation Act.

Statistics on vegetable oils and fats, edible fats, and major seasonings and sugar and starch are prepared by the Agricultural Production Bureau of MAFF. "Miso" bean paste and Soy sauce are based on the "Survey on Movement of Food Industry" by Minister's Secretariat Food Security Division of MAFF. Sauce is based on the "Census of Manufacturers" by Ministry of Economy, Trade and Industry.

Statistics on the shipment value of confectioneries, beverages and the shipment quantity of alcoholic beverages are the results of the "Census of Manufacturers" conducted by the Ministry of Economy, Trade and Industry.

Statistics on production of milk products are based on the results of the "Statistical Survey on Milk and Milk Products" initiated in May 1952 by the Statistics Department of MAFF.

Production of processed meat products is based on the results of the surveys conducted by the Japan Ham and Sausage Processors' Cooperative Association.

2 Production of processed fishery products

Statistics are based on the results of the "Statistical Survey on Processed Fishery Products" conducted by the Statistics Department of MAFF.

3 Production of canned foods and bottled food

Production quantity of canned and bottled food prepared by the Japan Canners Association is also shown in this part.
