Steps of risk analysis based on "Standard Procedure for Approval for Import of Designated Items into Japan to be Quarantined"

101 111160	re or boolghatou reomo into oupan to bo quara	
A country requests the Animal Health Authorities of Japan (AHA) to lift		
imp	ort ban on designated items	
The AHA develops and sends a questionnaire to the requesting country		
3. The	requesting country sends the fulfilled questionnaire and relev	ant
infor	mation to the AHA. Then the AHA examines the answers and ds additional questionnaires if necessary	
(step	2-3 may be repeated dependent on the case)	\neg
	4. The AHA confirms that the submerequesting country is complete	nittal of the
	AHA accepts the fulfilled questionnaire and acknowledge its re e requesting country	eceipt
Requesting Country		Japan
6. Con	duct on-site visit	
	 7. The AHA (risk assessment team draft risk assessment report 8. The AHA consults the Committee Health for risk assessment 	tee of Animal
	The Committee of Animal Health result of risk assessment to the second sec	· ·
10. Th	e AHA notify the result of risk assessment to the requesting c	ountry
11. Es	tablish Animal Health Requirements(AHR)	
12. Ti	ne AHA notify the AHR to the requesting country
