

**ANIMAL HEALTH REQUIREMENTS FOR RABBIT MEAT ETC. TO BE  
EXPORTED TO JAPAN FROM HUNGARY**

22/shouan/442

(Date of effect: 16 April 2010)

Animal health requirements for rabbit meat and rabbit meat products to be exported to Japan from Hungary (hereinafter referred to as “the exported rabbit meat etc.”) are applied as follows.

**(Definitions)**

“Rabbit meat etc.”

Meat, viscera of rabbit and their products (e.g.; sausage, ham and bacon)

“The approved facilities”

Slaughtering, processing and storage facilities for the exported rabbit meat etc. which are approved by the competent authority of Hungary

**(Requirements)**

1. The exported rabbit meat etc. is derived from rabbits which were kept in establishment where no case of Rabbit Haemorrhagic Disease (RHD) has been reported for 60 days, and no case of Myxomatosis and Tularemia has been reported for 15 days, prior to transport to the approved slaughterhouse.
2. The exported rabbit meat etc. is free from any animal infectious diseases including RHD, Myxomatosis and Tularemia as a result of ante- and post-mortem inspections conducted by official inspectors of the competent authority of Hungary or other EU Member State, at the approved facilities.
3. When rabbits and/or the rabbit meat for the production of the exported rabbit meat etc. originate from EU Member States other than Hungary, the EU Member State should fulfill the conditions specified in articles 1 and 2, and the rabbits and/or rabbit meat are transported and carried into the approved facilities in Hungary in such a way as to prevent them from being contaminated with pathogens of any animal infectious diseases.
4. When the exported rabbit meat etc. is derived from rabbits and/or rabbit meat which were imported from non-EU countries, the rabbits and/or rabbit meat must be free from any evidence of animal infectious diseases as a result of import inspection conducted by the competent authority of the EU Member State at the first entry into the EU. The rabbit and/or rabbit meat must be transported and carried into the approved facilities in Hungary in such a way as to prevent them from being contaminated with pathogens of any animal infectious diseases after the import inspection.
5. The exported rabbit meat etc. is stored in clean and sanitized wrappings and/or containers and handled in such a way as to prevent them from being contaminated with pathogens of any animal infectious diseases after slaughtering, processing and storage at the approved facilities until its shipment.
6. The competent authority of Hungary shall issue an inspection certificate for the exported rabbit meat etc., stating the following items in English:
  - (1) Compliance with the articles 1, 2, 3, 4 and 5 of the requirements
  - (2) Country of origin

- (3) Name, address and establishment number of the approved facilities
- (4) Date of slaughter and processing
- (5) Name of the port of shipment
- (6) Date and place of issuance of the inspection certificate, and name and title of the inspector
- (7) Seal number (if sealed)

7. When the exported rabbit meat etc. is derived from the rabbits and/or rabbit meat which were imported from non-EU countries, an original or a copy of inspection certificate issued by the competent authority of the country of origin satisfying all the conditions stated above must be attached to the inspection certificate issued by the competent authority of Hungary.
