

Long

This is an announcement from the Animal Quarantine Service and Plant Protection Station of the Ministry of Agriculture, Forestry and Fisheries in Japan.

Bringing animal products and plants into Japan is prohibited.

This includes products such as ham, sausages, fruits, vegetables, cut flowers and seeds.

In-flight meals are also not allowed to be taken into Japan, so please do not get off the plane with leftovers.

If you have animal products or plants, please come for an inspections at the "Animal Quarantine Counter" or "Plant Quarantine Counter" respectively before customs clearance.

In addition, if you have visited places with livestock or plan to come into contact with livestock in Japan, please come to the "Animal Quarantine Counter".

If you illegally import animal products or plants into Japan, you may be imprisoned for up to 3 years or fined up to 3 million yen in accordance with the law. In the case of a company or organization, the fine is up to 50 million yen. If you bring illegal animal products, you may also be denied entry to Japan.

We ask for your kind cooperation to prevent the introduction of animal infectious diseases such as African swine fever and harmful plant pests such as Fruit flies that are spreading in Asia and all over the world.

Thank you

Short

This is an announcement from the Animal Quarantine Service and Plant Protection Station of the Ministry of Agriculture, Forestry and Fisheries in Japan.

Bringing ham, sausages, fruits, vegetables or cut flowers into Japan is prohibited.

In-flight meals are also not allowed to be taken into Japan.

If you have animal products or plants, please declare them at the "Animal Quarantine Counter" or "Plant Quarantine Counter" respectively.

You may be punished if you bring your animal products or plants into Japan without inspections at the Animal Quarantine Service or Plant Protection Station. If you bring illegal animal products, you may also be denied entry to Japan.

We ask for your kind cooperation to prevent the introduction of animal infectious diseases and harmful plant pests that are spreading all over the world.

Thank you
