I, the undersigned official certify that:

#### I. Kind of processing treatment

1) A foot-and-mouth disease (FMD) virus inactivation treatment of milk products has been carried out in any stage of production by any of the following methods (please tick the appropriate box):

[NOT intended for cloven-hoofed-animals consumption]

- a minimum temperature of 132°C for at least one second in liquid form (UHT)
- (pH less than 7.0) a minimum temperature of 72°C for at least 15 seconds in liquid form (HTST)
- (pH 7.0 or greater) HTST applied twice
- maintaining a pH less than 6 for at least one hour

2) Name of country where processing (I) was carried out (if different from A-a) :

Remarks:

Certificate No. :

## II. Hygiene

1. Milk products to be exported to Japan have been produced from raw milk obtained from clinically healthy animals, and it is prohibited to use raw milk obtained from animals infected with animal infectious diseases as an ingredient according to legislation of the exporting country.
2. Raw milk used in the production of milk products to be exported to Japan has originated from herds which were not infected or suspected of being infected with FMD at the time of milk collection.
3. Milk products to be exported to Japan have been produced, packaged and stored from raw milk collection to shipment of final products to Japan without contamination by pathogens of animal infectious diseases or commingling with milk products which do not meet Articles 1 to 3 in Animal Health Requirements for milk products to be exported to Japan from countries other than Listed countries.
4. Packages and containers such as carton boxes for milk products to be exported to Japan have been clean and hygienic.
5. The products described here were processed under sanitary conditions in accordance with laws and regulations of Jersey, which have been accepted by Japan as equivalent.
