scientific name	Common name			
14. Latest examination				
Disease	Date of sampling	Date of test	Test method	Test result
YHD				

15. Zoosanitary information

I, the undersigned official inspector, hereby certify that the aquatic animals above satisfy the following requirements.

General information

- 1) The Japanese authority consults with the competent authority in the exporting country in light of occurrences of the target diseases and regulatory framework for disease control in the exporting country, and notifies beforehand the competent authority in the exporting country of which status will be assigned to the country for each target disease, status 1.A) or status 1.B).

☐ 1.A) The country, zone or compartment is free of the target disease:

Yellow head disease (YHD)

- a) The exported aquatic animals is confirmed to be from the country, zone or compartment that is confirmed to be free of the target disease under the surveillance by the competent authority in the exporting country based on the OIE code.

AND

- b) In the event of an outbreak of the target disease, it shall be notified to the competent authority in the exporting country.

AND

- c) The target disease is designated as the target of the official surveillance program of the exporting country in accordance with the OIE code.

☐ 1.B) The country, zone or compartment is not free of the target disease:

Yellow head disease (YHD)

- ☐ a) A sample of animals should be taken based on the sampling criteria in accordance with the OIE code (prevalence: 2%, confidence: 95%) under the supervision of the competent authority in the exporting country. RT-PCR should be thoroughly conducted and all test results should be negative.

AND

No occurrence of the target disease has been reported in aquaculture facilities or fishing areas of the exported aquatic animal at least for one year before the

export. Mass mortality of unknown cause has not occurred and the competent authority in the exporting country has not imposed any restriction with the intent of disease control.

OR

- ☐ b) The exported aquatic animals has been treated with heat processing enough to inactivate pathogen of target disease described below.

	Diseases	Samples	Diagnostic methods
i	Yellow head disease	The gills, lymphoid organ or pleopod	RT-PCR

- 2) The thorough inspections must be conducted by the competent authority or at the facility designated by the competent authority in the exporting country.
- 3) Aquaculture facilities of the exported aquaculture animals must be equipped with basic biosecurity control in accordance with the OIE code under the supervision of the competent authority in the exporting country.
- 4) The exported aquatic animals should not be given any live vaccine for the target disease.

Transport information

Materials such as containers and equipment used for transporting the exported aquatic animal should be new, or washed and disinfected properly.
