*Veterinary Certificate for milk products from cloven-hoofed animals
to be exported to Japan from Guernsey*

Certificate No. :

Date :

A. Details of dispatched consignment

- I. Exporting country :
- II. Container No. :
- III. Seal No. :
- IV. Shipping mark :
- V. Type of packages :
- VI. Name and address of consignor :
- VII. Name and address of consignee :

B. Identification of products (Annex form can be used if needed)

- I. Type of products (e.g. Cheese, Butter) :
- II. Net weight :
- III. Number of packages :
- IV. Date of production :
- V. Animal species of dairy ingredients :
- VI. Country of origin :
- VII. Establishment number :
- VIII. Establishment name and address :
- IX. Purpose of use (please tick the appropriate box) :
 - Human consumption
 - Animal consumption (cloven-hoofed animals / other animals / pet food)
 - To be determined (likely to use for cloven-hoofed animal consumption) Other (.....)

Remarks :

C. Kind of processing treatment

- I. A foot-and-mouth disease (FMD) virus inactivation treatment of milk products has been carried out in any stage of production by any of the following methods (please tick the appropriate box):

[NOT intended for cloven-hoofed-animals consumption]

- a minimum temperature of 132°C for at least one second in liquid form (UHT)
- (pH less than 7.0) a minimum temperature of 72°C for at least 15 seconds in liquid form (HTST)
- (pH 7.0 or greater) HTST applied twice
- maintaining a pH less than 6 for at least one hour

Certificate number:

[Intended for cloven-hoofed animals consumption (or likely to use for this purpose)]

- HTST applied twice
- HTST combined with another physical treatment, maintaining a pH less than 6 for at least one hour or additional heating to at least 72°C combined with desiccation
- UHT combined with another physical treatment, maintaining a pH less than 6 for at least one hour or additional heating to at least 72°C combined with desiccation

II. Name of country where C-I was carried out (if different from A-I) :

D. Certification

I, the undersigned official veterinarian, certify that:

- I. Milk products to be exported to Japan have been produced from raw milk obtained from clinically healthy animals, and it is prohibited to use raw milk obtained from animals infected with animal infectious diseases as an ingredient according to legislation of the exporting country.
- II. Raw milk used in the production of milk products to be exported to Japan has originated from herds which were not infected or suspected of being infected with FMD at the time of milk collection.
- III. Milk products to be exported to Japan have been produced, packaged and stored from raw milk collection to shipment of final products to Japan without contamination by pathogens of animal infectious diseases or commingling with milk products which do not meet Articles 1 to 3 in Animal Health Requirements for milk products to be exported to Japan from countries other than Listed countries.
- IV. Processing or production of the products was carried out in a sanitary manner based on equal or better criteria than those of Japan.
- V. Packages and containers such as carton boxes for milk products to be exported to Japan have been clean and hygienic.
