

Procedure of controlled discharge

- Based on the basic policy which the GOJ announced , TEPCO has been preparing facilities for securing safety in the handling of the ALPS treated water.
- **Subject to the approvals** of the independent Nuclear Regulation Authority (NRA) to the detailed plan, TEPCO can start the discharge into the sea (envisaged to take place approximately after **two years**).
- IAEA review will be conducted **before, during and after** the discharge of the water.
