

# Japan's Global MIDORI Cooperation Plan (launched in Dec 2024)

*Japan's Proposal for Strengthening Cooperation with various Countries  
to Enhance Resilient and Sustainable Agriculture, Forestry, Fisheries and Food Systems to Ensure Regional Food Security*

- **Close cooperation with the developing countries** and **taking into account regional characteristics.**
- Three basic principles as follow
  - (1) agricultural sustainability should be **improved in the direction of higher productivity**
  - (2) food system should be **strengthened by making maximum use of existing** domestic agricultural **resources**
  - (3) **all forms of innovation should be used**
- In addition to the private sector, promote initiatives in **collaboration with** industry, academia, government, and finance,, and financial institutions, and **international organizations such as FAO, WFP, and IFAD.**

Example of  
the Activities

## Productivity

New varieties development  
optimal food processing  
efficient water management

## Sustainability

Reduce environmental burden and  
increase farmers' income through  
Joint Crediting Mechanism (JCM)

## Risk management

Dialogue on food assistance in  
emergencies and stable supply  
of products
