

Agribusiness Vision in Palau

August 27th 2020

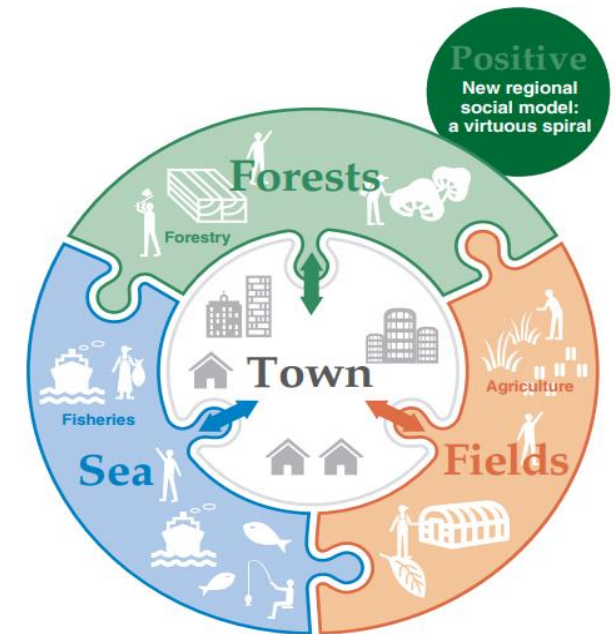

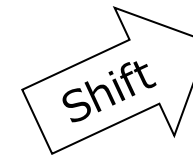

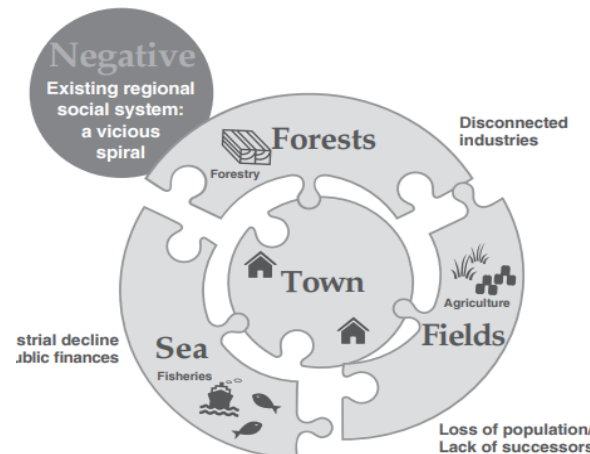

AMITA Corporation
Overseas Business Team

The Mission of AMITA Group Design a Sustainable Society

Concept of **AMITA's** Social Design Business

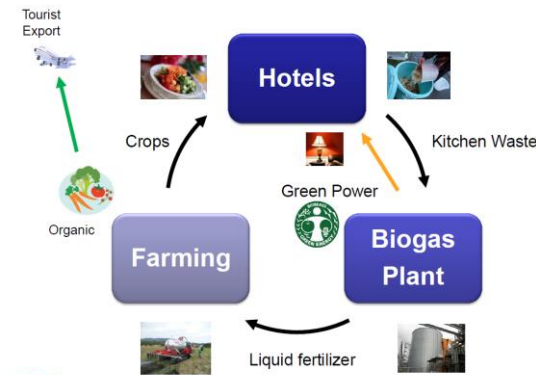

- Provides solutions to social issues.
- Natural capital and human capital are enriched.
- Social technology that combines soft and hardware.
- The resources Circulation(resources, energy, food)

Comprehensive Cyclical System
Utilizing Negative Resources Usage

AMITA's PJ Progress in Palau

Proposal: Circulation Model in Cooperation with Eco-conscious Hotels

-2013 Primary Survey to Structure a Resource Circulation System (MoE: Ministry of Environment)

-2014-15 Project on feasibility study on comprehensive resource circulation system for low carbon (MoE)

-2015-16 Comprehensive Resource Circulation System Project (MoE)
Signed MoU with KSG

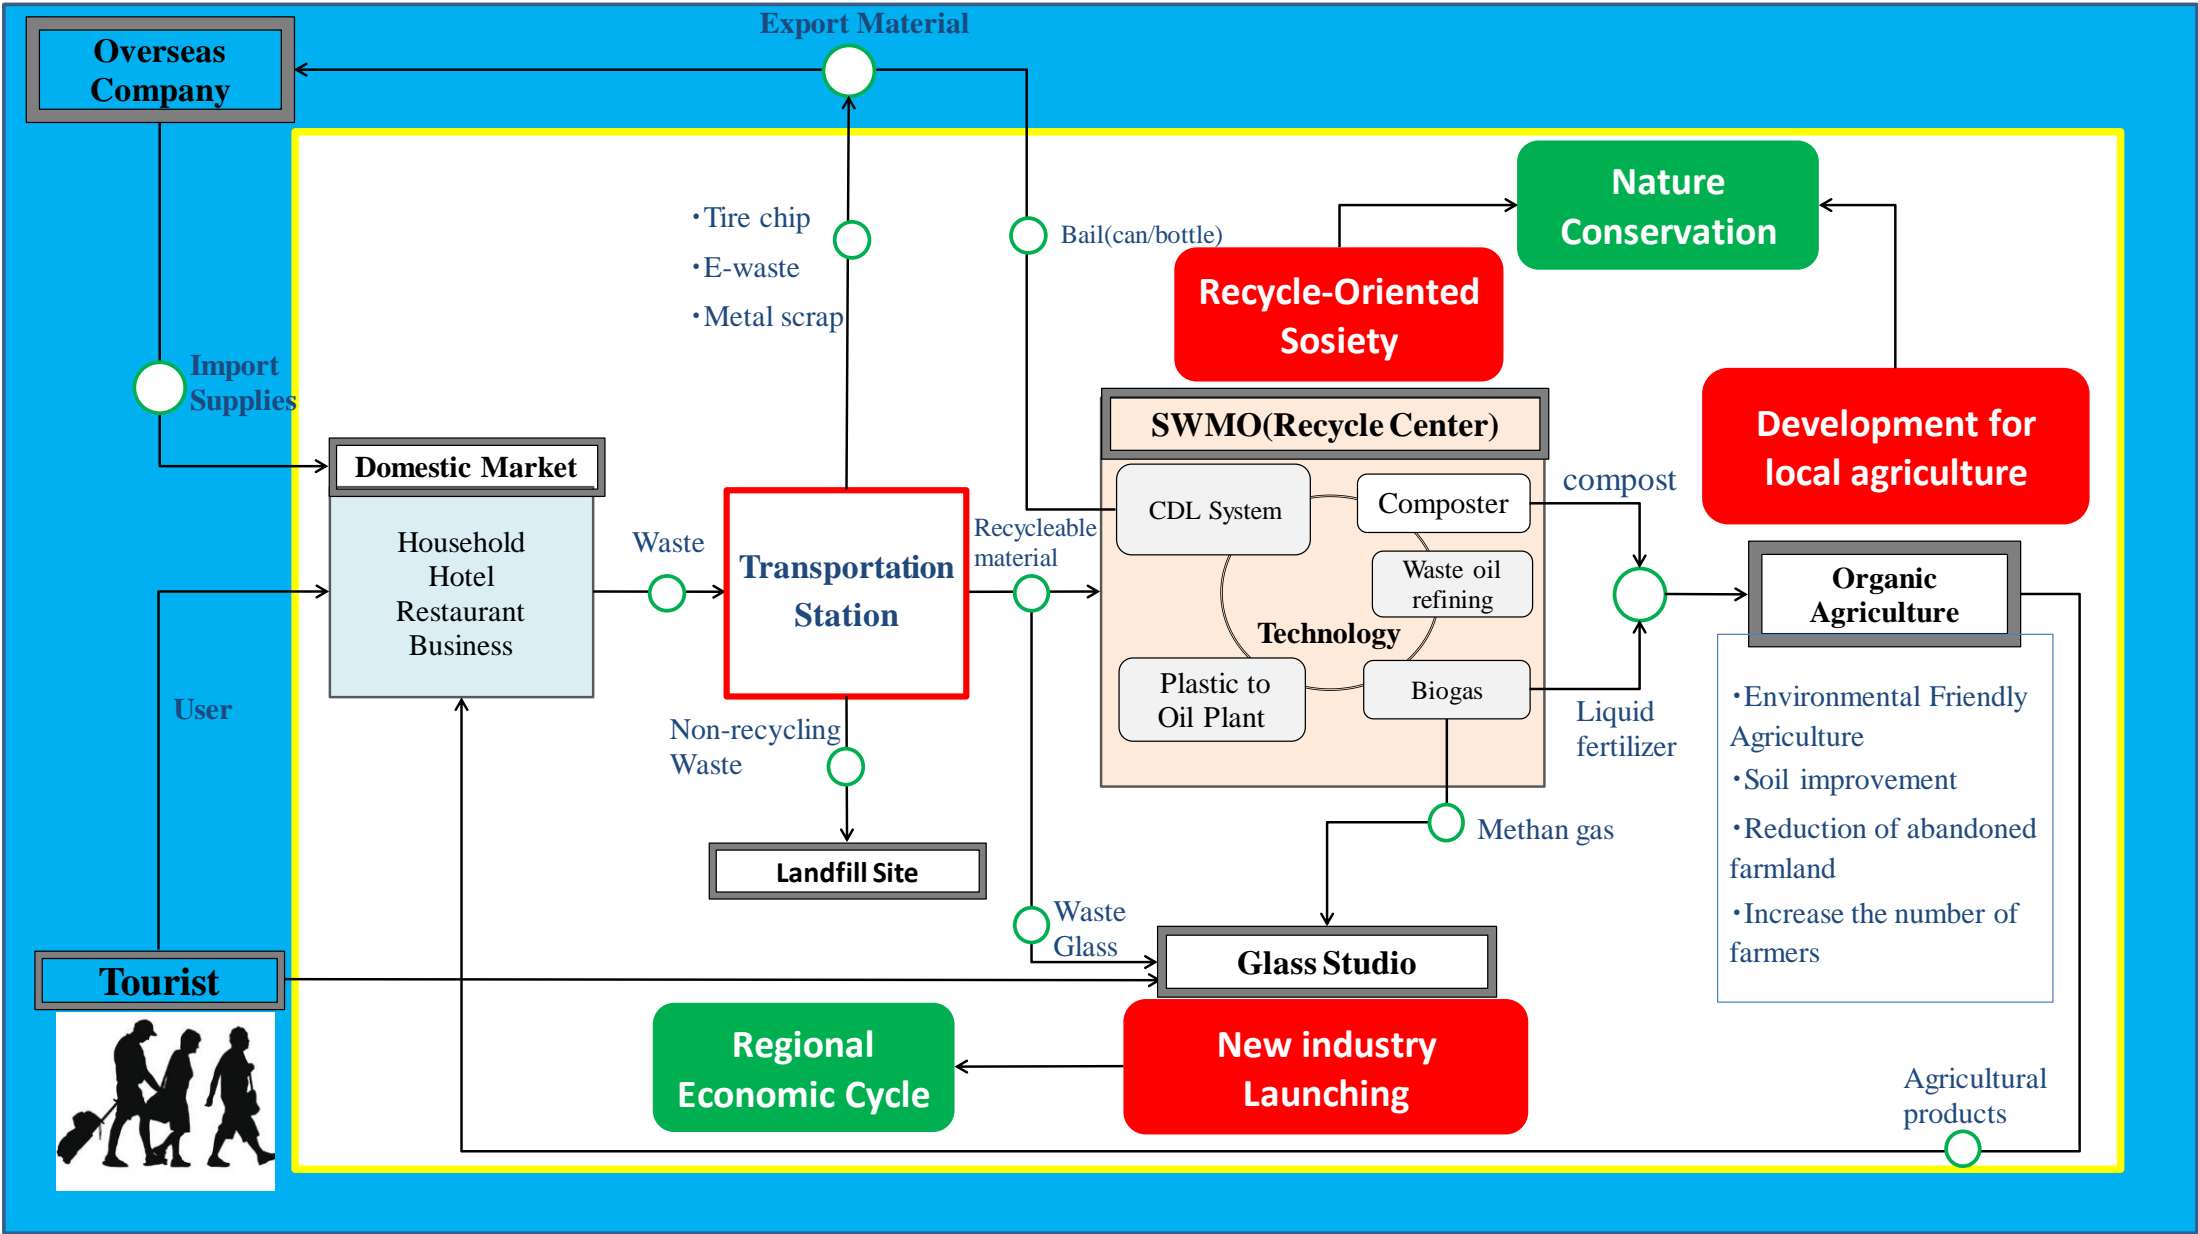

-2016-17 Feasibility study and basic design of the biogas system (MoE)

-2017-18 Pilot Survey for Disseminating SME's Technologies for Organic Resource Circulation System Using compact Methane Fermentation Technology in Palau (JICA)

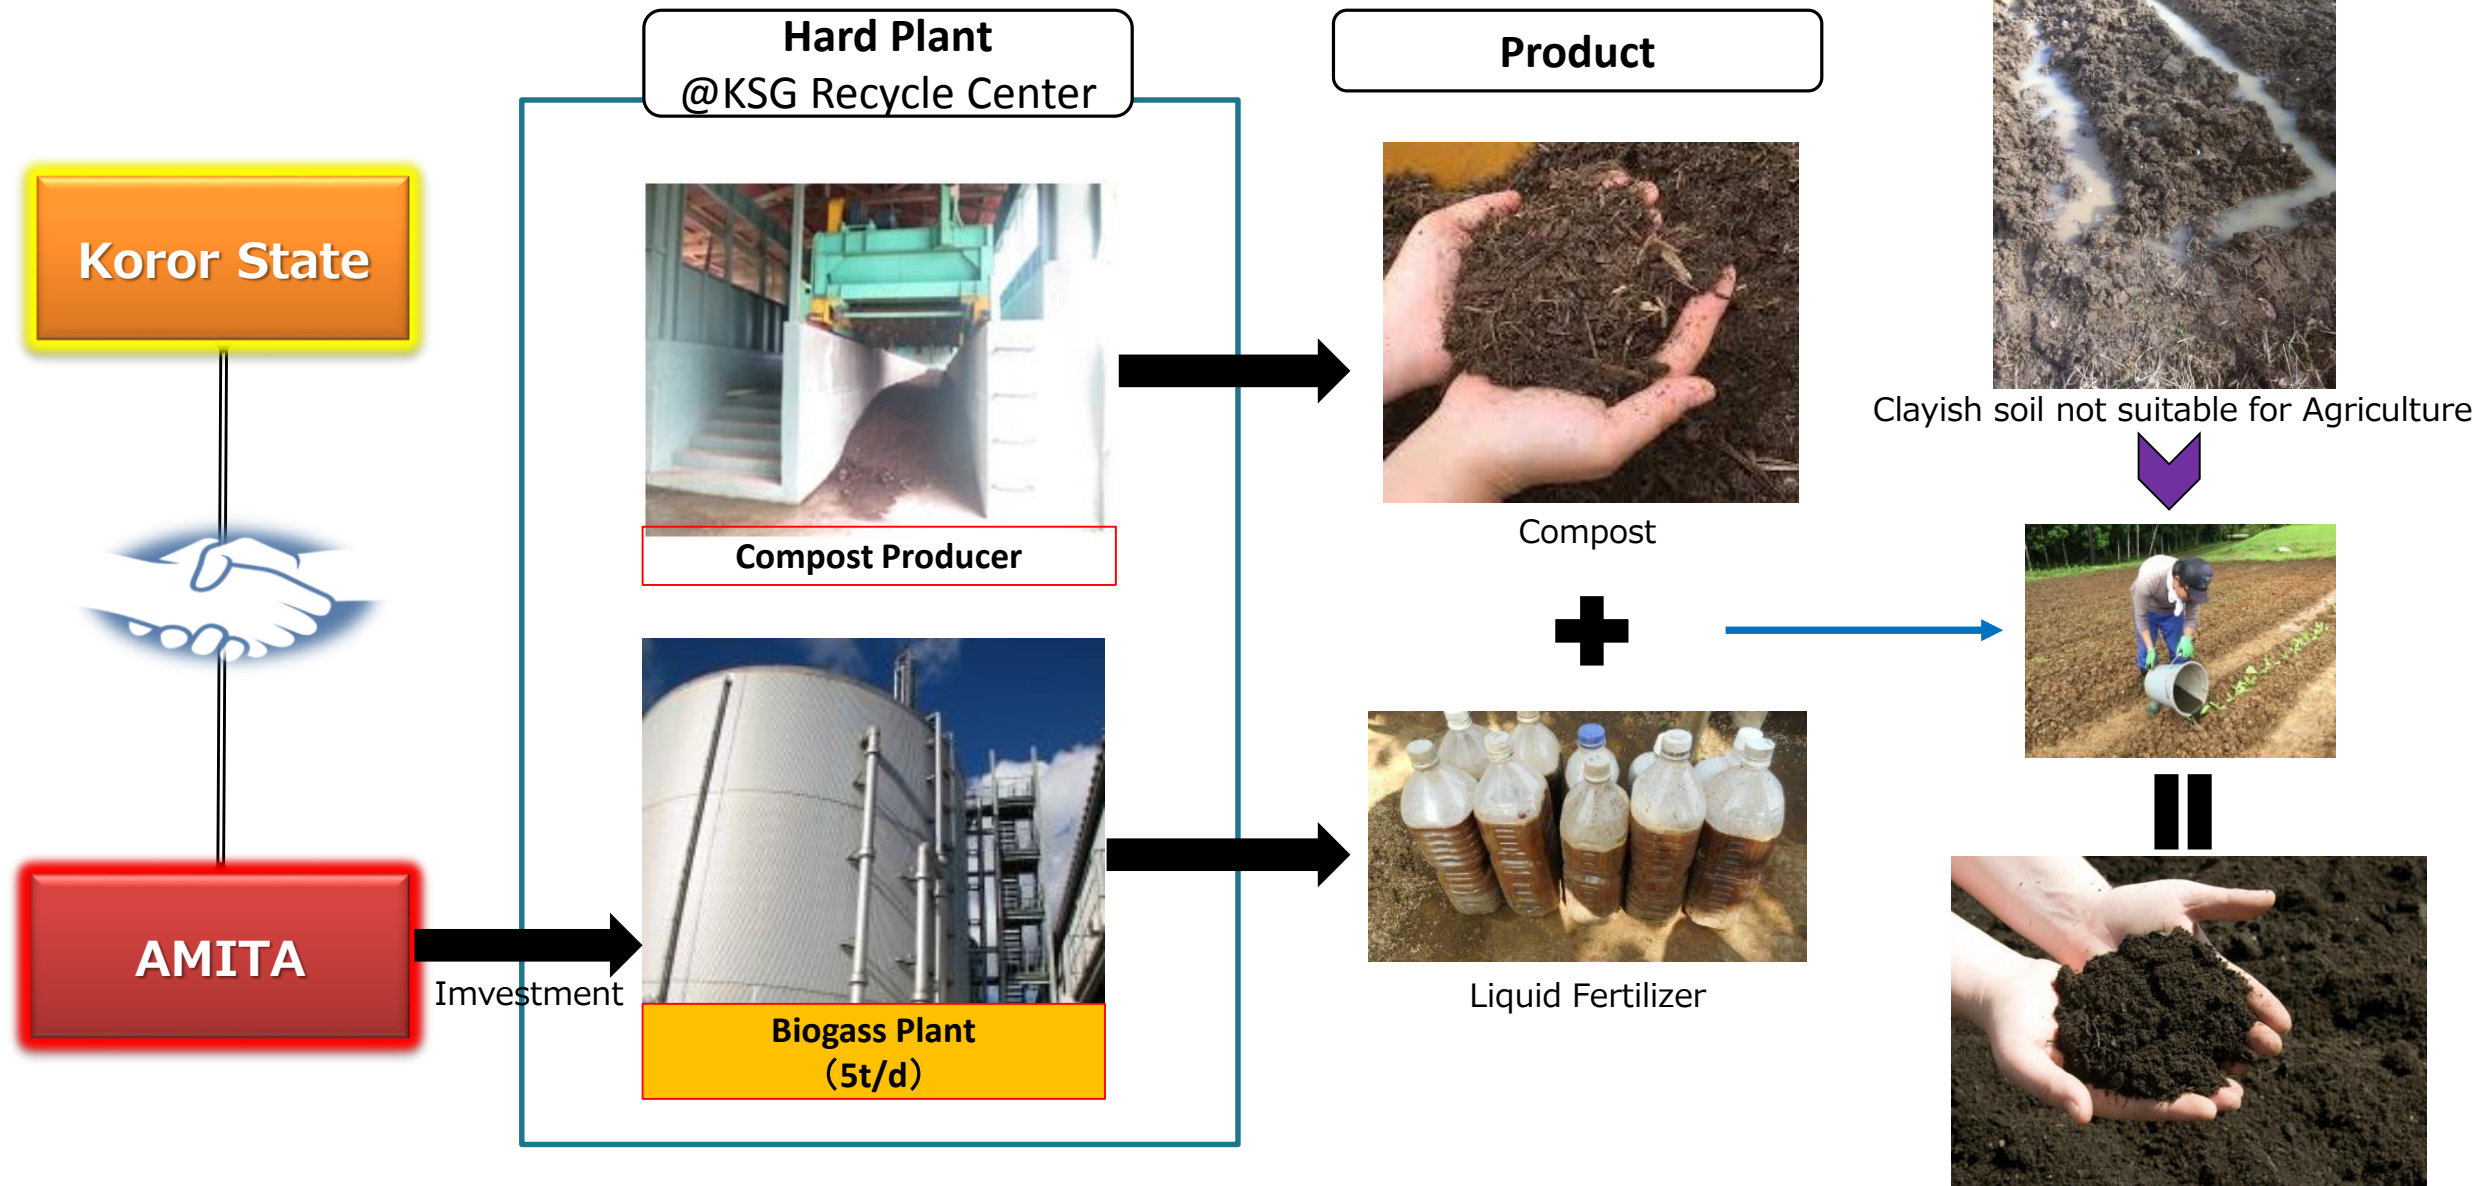

-2019-20 Survey for Waste Transshipment Facility in Koror State (MoE)

NEW business (PPP with KSG) will launch in the future

Goal Image : Recycle-Oriented Society

Agricultural Product from PPP business

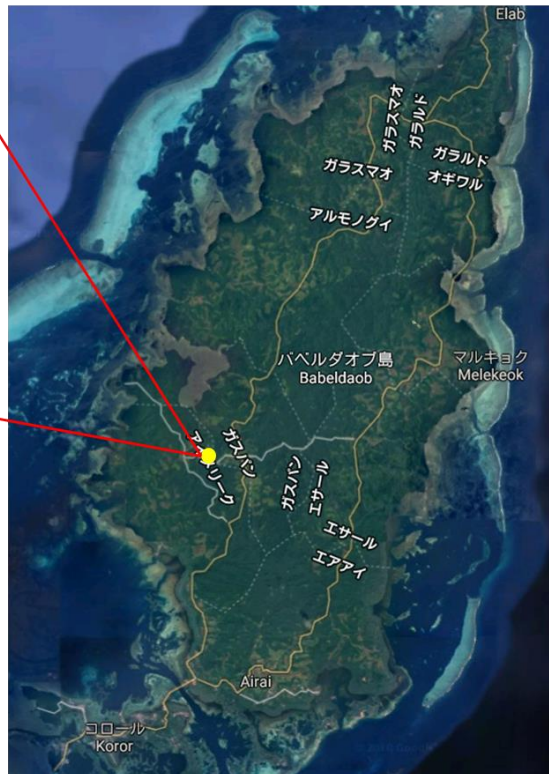

Location & Soil improvement method

- Location
: Former Oiska's farmland in Aimeliik

Scale : 1.3ha

Method: Solar Heat Treatment

Scattering compost

Spraying
Liquid fertilizer

covering with
transparent poly sheet
for solar heat treatment.

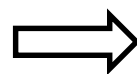

Test plantation result
① (treated) ② (control)

Create a Local Organic Food Market

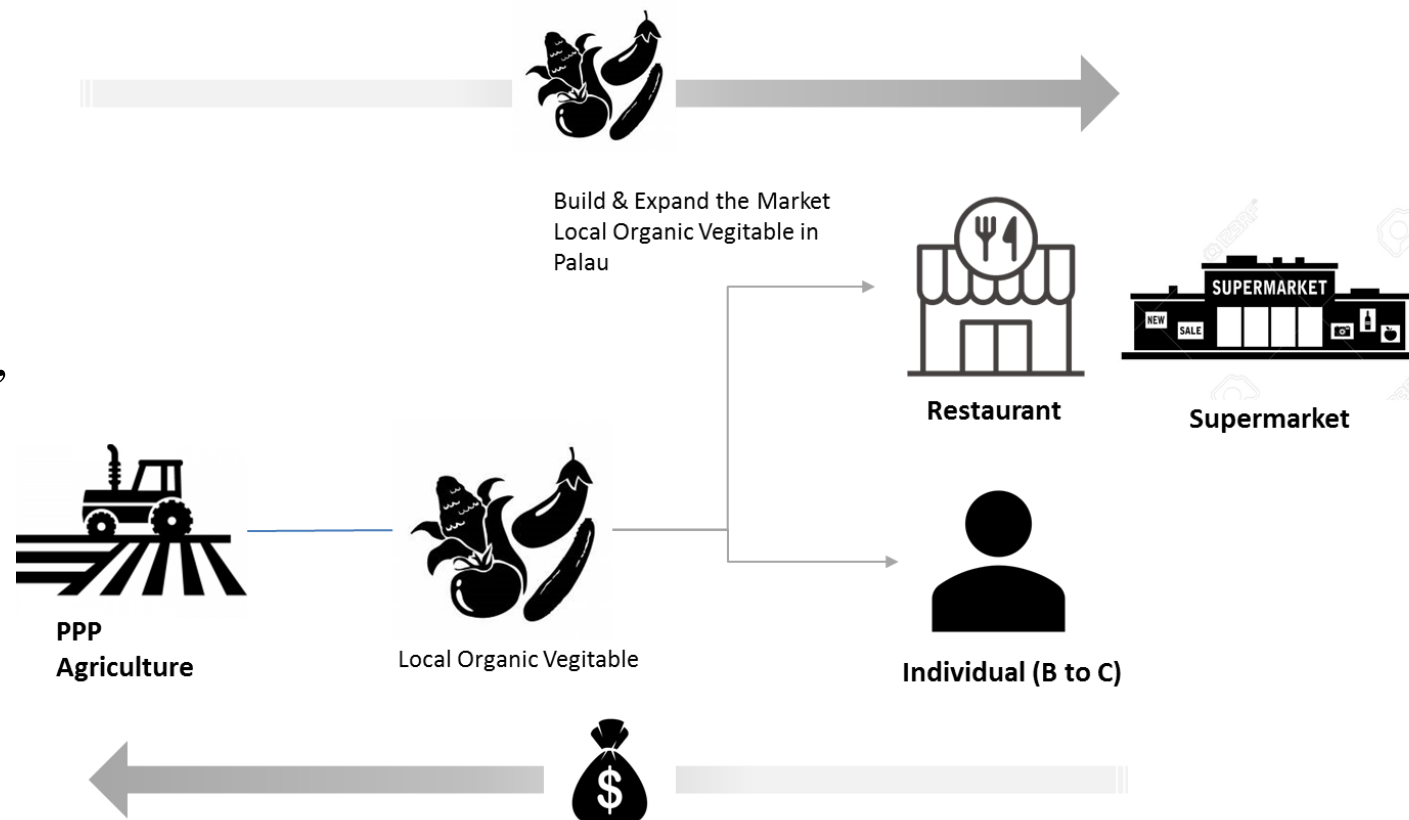

Agricultural Challenges

- The number of Palauan farmers are few.
- The number of farmland is few
- The price of chemical fertilizer is expensive.

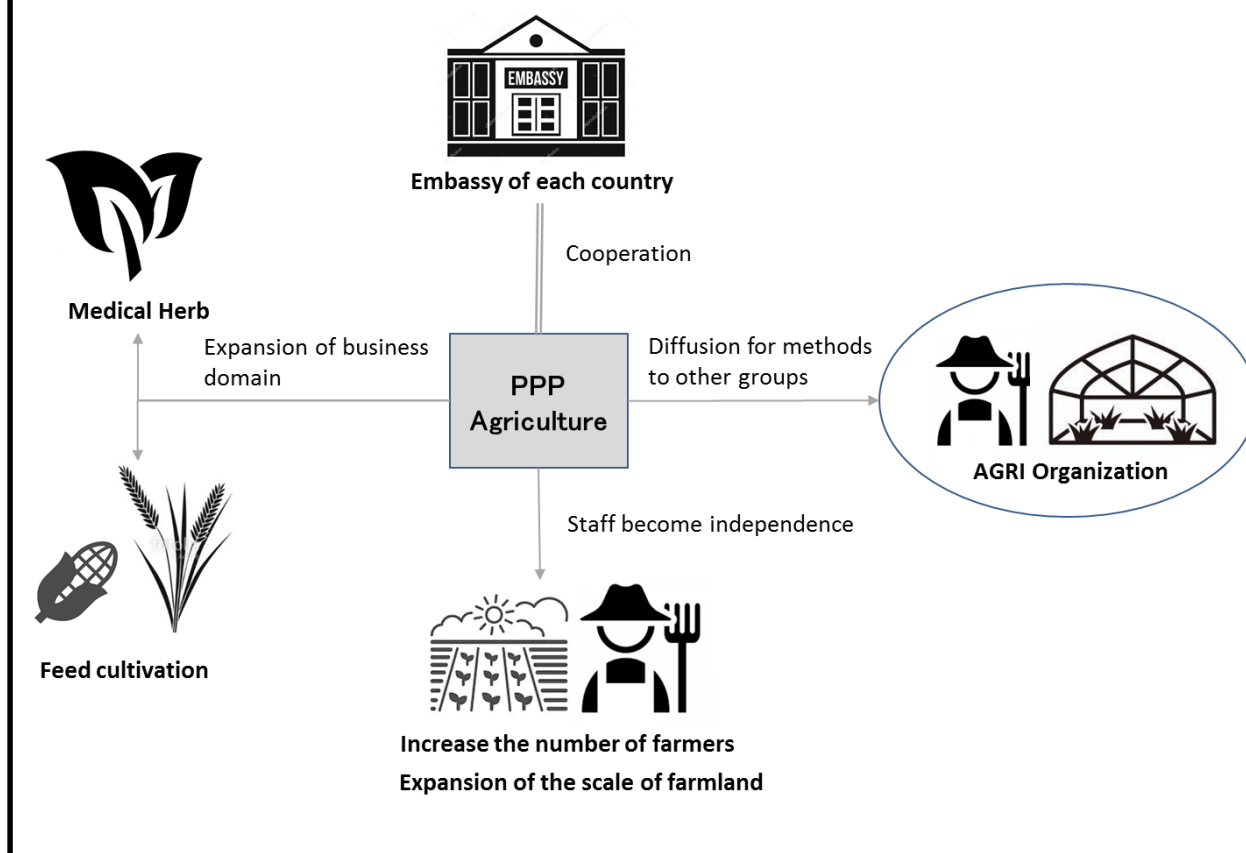

Agriculture is not profitable work

PPP will create a local organic vegetable market,
and build a sales network.
Turning agriculture into a profitable job

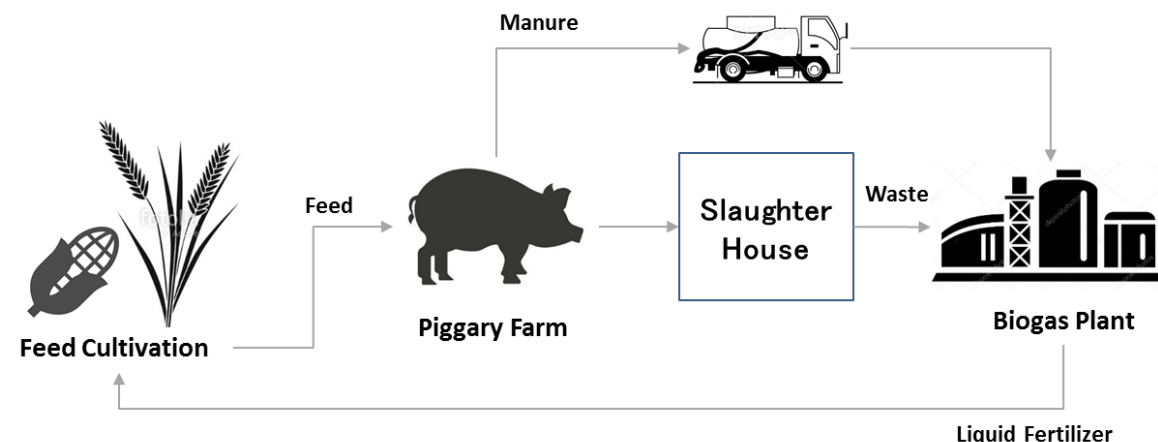

Further Business Idea

- Independence of Palawan staff as a farmer.
- Development of abandoned farmland
- Agricultural cooperation with embassies of other countries.
- Diffusion for agricultural methods to other groups.
- Cultivation of feed and herbs

Cooperation with piggery farmer by self-sufficiency of domestic feed and biogasification of manure & meat processing residue

Contributing to the health of islanders by devising a healthy recipe using local organic product and supplying it to school meals and hospital meals
