Overview of Export Production Areas

The Takamatsu Bonsai Export Organization was established in 2013 to expand the export of “BONSAI” produced primarily in Takamatsu City and to establish the brand "Takamatsu Bonsai" for international markets. The association currently has 20 members.

Recently, “BONSAI” have become globally renowned, and the association is engaged in exports to Asia, Europe, and the Americas.

Export Training Seminar

Nematode Control for  
Export Bonsai

Actions for Compliance with Export Regulations

Each year, the association creates pest control schedules to meet export conditions for various countries and conducts export training sessions to promote cultivation techniques that comply with export requirements.

For exports to Taiwan, the association introduces members to Nematode countermeasure technology that minimize root damage, helping to maintain quality after export. For the EU, they assist with and provide guidance on cultivation site registration inspections.

Business Meeting with  
Overseas Buyers

Demonstration at the  
Almere International  
Horticultural Expo

Promotional Points

The association will cooperate with necessary research to enable future exports of black pine bonsai to the United States, addressing pest and disease issues.
