Actions for Compliance with Export Regulations

Established in 2023 with the goal of expanding exports of chicken produced at its own poultry farm and contracted farms, and processed at Oyama Co., Ltd.'s main plant in Ichinoseki City, Iwate Prefecture.

Exporting fresh meat, chicken feet, and processed chicken products to Hong Kong, Vietnam, and Cambodia, with ongoing efforts to expand export quantities.

Promotional Points

A new processing facility is under construction, scheduled to start operations in April 2025. The new plant is planned to process over 80,000 birds, more than double the current capacity of 35,000 birds, resulting in a significant increase in production volume.

As a consortium, efforts are also focused on expanding export destinations and exploring opportunities in third countries.
