Overview of Export Production Areas

A robust egg export system has been established in collaboration with multiple production areas across the country. The company meets the quality and stable supply demands of importing countries, offering a diverse lineup of products, including raw and processed eggs for both retail and industrial use.

Actions for Compliance with Export Regulations

The Quality Assurance Department of JA Zen-Noh Tamago Co., Ltd. conducts mutual inspections with production areas across more than 60 inspection items. In addition, shelf-life preservation inspections for heat-treated products required by Hong Kong and Macau are carried out before exporting.

The ability to collect products from multiple production areas nationwide enables the company to offer a wide range of product proposals and provide alternative options in case of unforeseen circumstances.

Promotional Points

Through JA ZEN-NOH Group's JA ZEN-NOH International Co., Ltd., the company can propose exports to multiple countries. In 2022, the company established an egg processing plant in Hong Kong (FSSC 22000 certified), which handles locally manufactured processed products made from Japanese eggs.

The company has received grants through projects like the "Strengthening Export Capabilities for Item-Specific Organizations Support Project," addressing common challenges across Japan and expanding market reach.
