

ASF Overall Response System

Implementation Strategy

Emergency On-Site Response

> Nationwide Continuous Surveillance

Designation
of Control Areas

Fence
Installation

Key Points

1. Expansion of Management to Non-Affected Areas
2. Installation of Large-Scale (Wide Area) Fencing
3. Establishment of Clean Zones (Buffer Zone)
4. Nationwide Testing of All Wild Boar Samples ('22~)
5. Focused Response in Affected and Risky Areas Using Scientific Methods

ASF Overall Response System

2024

2025

Implementation Strategy

Emergency On-Site Response

➤ **Nationwide Continuous Surveillance**

➤ **Prevention of Human-Mediated Spread**

**Designation
of Control Areas**

**Fence
Installation**

Key Points

1. Expanding the scope of management to include human-related risk factors
(e.g., inspections of biosecurity practices)
2. Strengthening biosecurity throughout the entire response process
3. Enhancing ASF response ability by local governments and related agencies
