

## The Details of Additional Declarations

After the date of entry into force of the provisions for inspections at growing sites in exporting countries and the newly approved phytosanitary measures, additional declarations specified in the articles 1 and 2 below shall be stated on a phytosanitary certificate of exporting countries specified in the annexed tables 1-2 and 2-2 of the revised Enforcement Ordinance respectively.

### 1. Inspections at growing sites, specified in the annexed table 1-2 (effective as of 7 March, 2012)

#### a. *Meloidogyne chitwoodi*, *Heterodera schachtii*, *Meloidogyne fallax*, *Nacobbus aberrans* and *Radopholus similis*

*"This is to further certify that the plants were grown on a farm(s) where XXX has/have not been recorded, and these plants were inspected on the field during the growing season and the growing medium of the growing site(s) and the underground parts of the plants were examined by an appropriate method(s) and found to be free from the pest(s) mentioned above."*

Replace the XXX with the scientific name(s) of either *Meloidogyne chitwoodi*, *Heterodera schachtii*, *Meloidogyne fallax*, *Nacobbus aberrans* or *Radopholus similis*, as appropriate.

"(A) farm(s) where XXX has/have not been recorded" includes a farm(s) where the pest(s) was recorded previously, but has been eradicated.

#### b. *Fusarium oxysporum* f. sp. *pisi*

*"This is to further certify that the parent plants were grown on a farm(s) where Fusarium oxysporum f. sp. pisi has not been recorded, and these plants were inspected on the field during the late growing season and found to be free from the pest mentioned above."*

"(A) farm(s) in which *Fusarium oxysporum* f. sp. *pisi* has not been recorded" includes a farm(s) where the pest was recorded previously, but has been eradicated.

#### c. *Phytophthora kernoviae* and *Phytophthora ramorum*

*"This is to further certify that the plants were grown on a farm(s) where XXX has/have not been recorded, and these plants were inspected on the field during the growing season and found to be free from the pest mentioned above."*

Replace the XXX with the scientific name(s) of *Phytophthora kernoviae* and/or *Phytophthora ramorum*, as appropriate.

"(A) farm(s) where XXX has/have not been recorded" includes the farm(s) where the pest(s) was recorded previously, but has been eradicated.

**d. *Curtobacterium flaccumfaciens* pv. *flaccumfaciens***

*"This is to further certify that the parent plants were inspected on the field during the late growing season and found to be free from Curtobacterium flaccumfaciens pv. flaccumfaciens."*

**e. *Acidovorax avenae* subsp. *citrulli***

*"This is to further certify that the parent plants were inspected on the field during their fruit maturity stage before harvest and found to be free from Acidovorax avenae subsp. citrulli."*

**f. *Pantoea stewartii*, *Broad bean stain virus* and *Broad bean true mosaic virus***

*"This is to further certify that the parent plants were grown on a farm(s) where intensive controls against the vectors of XXX were carried out, and where these plants were inspected on the field during the most active growing season and found to be free from the pest mentioned above."*

Replace the XXX with the scientific name of either *Pantoea stewartii*, *Broad bean stain virus* or *Broad bean true mosaic virus*, as appropriate.

**g. *Clavibacter michiganensis* subsp. *nebraskensis***

*"This is to further certify that the parent plants were inspected on the field during the most active growing season and found to be free from Clavibacter michiganensis subsp. nebraskensis."*

**h. *Plum pox virus***

*"This is to further certify that the plants were grown on a farm(s) where intensive controls against the vectors of Plum pox virus were carried out, and these plants were inspected on the field during the early growing season and found to be free from Plum pox virus."*

**i. *Potato spindle tuber viroid***

**For seeds of potato and tomato**

*“This is to further certify that the parent plants were grown on a farm(s) where **Potato spindle tuber viroid** has not been recorded, and these plants were inspected on the field and tested by an appropriate genetic method(s) such as RT-PCR assay during the hot growing season and found to be free from **Potato spindle tuber viroid**.”*

"(A) farm(s) in which *Potato spindle tuber viroid* has not been recorded" includes a farm(s) where the pest was recorded previously, but has been eradicated.

**For live plants of potato and tomato**

*“This is to further certify that the plants were grown on a farm where **Potato spindle tuber viroid** has not been recorded, and these plants were inspected on the field and tested by an appropriate genetic method(s) such as RT-PCR assay during the hot growing season and found to be free from **Potato spindle tuber viroid**.”*

"(A) farm where *Potato spindle tuber viroid* has not been recorded" includes a farm where the pest was recorded previously, but has been eradicated.

**2. The newly approved phytosanitary measures, specified in the annexed table 2-2 (effective as of 7 September, 2011)**

**a. *Phytophthora kernoviae* and *Phytophthora ramorum***

*“This is to further certify that the growing media and/or the mulch materials of plant origin were disinfected by heat treatment specified in section III of the certificate and found to be free from **XXX**.”*

Replace the XXX with the scientific name(s) of either *Phytophthora kernoviae* and/or *Phytophthora ramorum*, as appropriate.

In addition, in the section III of the phytosanitary certificate (Disinfestation and/or Disinfection Treatments) it should be stated that the growing media and/or the mulch materials were disinfected by heat treatment at 71 degrees Celsius or higher for 75 consecutive minutes or longer, with the date of the treatment stated.

Additional declarations shall be stated on a phytosanitary certificate from exporting countries, as described above, if it is not possible to identify the botanical name of component plants of the growing media and/or the mulch materials of plant origin that are exported from the regions listed in the 'Districts' column of the sections 1 or 2 in the annexed table 2-2 of the revised Enforcement Ordinance of the Plant Protection Law. However, this requirement will not be applicable in cases where it is obvious that the growing media and/or plant materials concerned do not contain the plants listed in the 'Plants' column of the section 1 or 2 of the annexed table 2-2 of the law.

**b. *Potato spindle tuber viroid***

*“This is to further certify that the plants were born from seeds or parent plants that have not been infected with Potato spindle tuber viroid and that have been cultivated in a farm(s) where the pest has not been recorded. These plants were tested by an appropriate genetic method(s), such as RT-PCR assay during the hot growing season or during export inspection and found to be free from the pest mentioned above.”*

"(A) farm where the pest has not been recorded" includes the farm where the pest was recorded previously, but has been eradicated.
