Strawberries scheduled to be provided

Amaou ®

Everyone knows the king of strawberries. The fruit is large and round in the shape of a cone. It is characterized by its deep red color, and its flesh is hard and juicy. It's very flavorful and sweet and sour are harmonious. It is grown only in Fukuoka Pref.

Ichigo-san ®

Enchanted and beautiful cone shape with deep red skin. Even the flesh turns red. It has a fresh aroma and gorgeous sweetness and is juicy and full of juice. It has a good balance of sweetness and sourness. I also recommend sweets.

Youbeni

The fruit is large and conical in shape. The skin is shiny and bright red, and the inside of the flesh is red. It is hard, fresh and has a good balance of sweetness and sourness. It has a rich taste. The bright red color goes well with cakes.

Yumenoka

The fruit is large and conical. The flesh is moderately hard and juicy. The sweetness and sourness harmonize well, and you can enjoy the sweet and sour taste. It also goes well with fresh cream. It is mostly produced in Nagasaki Pref.

Awayuki

Raised by the Yamashita family in Kagoshima Prefecture. The sourness is moderate and the sweetness is strong. It has a light taste and the gentle fragrance of white strawberries spreads. The pericarp is white, but the seeds are red. It's very rare.

Sagahonoka

It is a very famous variety. It has a nice cone shape. It is characterized by slightly hard and white pulp. The acidity is mild and sweet. The sweet smell is very strong. Licca-chan served as a billboard from 2007 to 2020.

Berryts ®

Oita Prefecture spent eight years developing it. Vivid red color and gloss. Fruit juice overflows with a rich aroma. High sugar content and a good balance of sweetness and acidity. Exports are small and rare. Please come to Oita and eat it.

Satsumaotome

The fruit is large and bright red and shiny, and the inside is white. It has less acidity, high sugar content and accentuates sweetness, and is characterized by peach-like aroma and flavor. It's a difficult variety to grow. It is grown only in Kagoshima pref.

Koi Minori

The fruit is slightly round, and the fruit weight is large. The skin is bright red and shiny, and the flesh is white. The fragrance is rich, and the sweetness and sourness are harmonious. It keeps well. It is mostly produced in Nagasaki Pref.
