Additional list of Thrips (Thysanoptera) Intercepted at Plant Quarantine of Japan III. Masami MASUMOTO, Yoshikatsu ODA<sup>1)</sup> and Takeshi HAYASE<sup>2)</sup> (Yokohama Plant Protection Station, 1-16-10, Shin-yamashita, Naka-ku, Yokohama 231-0801, Japan) (Present address; <sup>1)</sup>Kobe Plant Protection Station, 1-1, Hatoba-cho, Chuo-ku, Kobe 650-0042, Japan; <sup>2)</sup>Yokohama Plant Protection Station, Sapporo Sub-station, 1 Hitsujigaoka, Toyohira-ku, Sapporo 062-0045, Japan). Res. Bull. Pl. Prot. Japan 39: 89-92 (2003).

**Abstract:** In the Plant Protection Station of Japan, the thysanopterous fauna of imported plants has been researched since 1987 at sea- and air-ports where these are imported plants. Previously, more than 100 Thysanoptera species, representing 50 genera and 3 families (Aeolothripidae, Thripidae and Phlaeothripidae) had been reported. In this paper, 52 species of 35 genera within 3 families are newly reported, and 32 species found from the plants and localities not seen in the past plant quarantine records also are reported.

**Key words:** Thysanoptera, thrips, plant quarantine, Japan, intercept

### 緒 言

我が国の生植物、特に野菜及び切花の輸入量は最近10年間で急増しており、これらからの害虫発見回数が、輸入検査における全害虫発見回数に占める割合は、1989年には50%以下であったのが1999年には70%に達している（榎本ら、2000）。また、これら生植物からの発見害虫ではアザミウマ類、アブラムシ類、カイガラムシ類等の微小害虫が特に多い。

植物防疫所では、このような微小害虫の付着状況を把握するため、1987年から全国の生植物が輸入される海・空港において輸入検査で発見された微小害虫の標本を集めし種名解明を行っている。これまで、アザミウマ目は属まで判明したものを含め3科50属100種以上が明らかになっている（早瀬、1991；小田・早瀬、1994；榎本ら、1997）。

本稿では、それ以降新たに発見された3科35属52種（属まで判明した10属13種を含む）を、それらが発見された植物及び産地を付して報告するとともに、既に報告されている32種についても新たな植物と産地の組み合わせを併せて報告する。

本文に先立ち、ご多忙にもかかわらず多くの種について同定の労を賜りご指導いただいた東京農業大学岡島秀治教授、オーストラリア CSIRO の L. A. MOUND 博士、ドイツ Senckenberg 博物館の ZUR STRASSEN 博士、また多忙な検査の傍ら標本集積にご協力をいただいた植物防疫所各技官の方々に厚くお礼申し上げる。

### 1. 検疫初記録種 Newly recorded thrips to Japanese plant quarantine

Suborder TEREBRANTIA (アザミウマ亜目)

Family AEOLOTHRIPIDAE (シマアザミウマ科)

\**Aeolothrips scabiosativia* MOULTON

*Erica* sp. [South Africa]

\**Stomatothrips brunneus* CRAWFORD

*Asparagus officinalis* [Mexico]

Family THRIPIDAE (アザミウマ科)

Subfamily PANCHAEOTHRIPINAE (アミメアザミウマ亜科)

\**Caliothrips indicus* BAGNALL

*Anethum glaveolens* [Thailand]

\**Tryphactothrips rutherfordi* (BAGNALL)

*Anthurium* sp. [Sri Lanka]

Subfamily SERICOTHRIPINAE

*Neohydatothrips* sp. 1

<sup>1)</sup> 現在、神戸植物防疫所

<sup>2)</sup> 現在、横浜植物防疫所札幌支所

\* Not Known to occur in Japan

- Anigozanthos* sp. [Zimbabwe]  
 Subfamily THRIPINAE (アザミウマ亜科)  
*Anaphothrips sudanensis* TRYBOM アワキオビア  
 ザミウマ  
*Allium fistulosum* [China], *Asparagus officinalis*  
 [Thailand], cutflowers [Zimbabwe]  
*\*Anaphothrips varii* MOULTON  
*Hypericum* sp. [New Zealand]  
*Aptinothrips rufus* (HALIDAY)  
*Camaecyparis pisifera* [Denmark], *Nasturtium*  
*officinale* [U.S.A.]  
*\*Bathrips* sp.  
*Ocimum basilicum* [Thailand]  
*Bolacothrips striatopennatus* (SCHMUTZ)  
*Asparagus officinalis*, *Coriandrum sativa* [Thailand]  
*\*Craspedothrips minor* (BAGNALL)  
*Acacia farnesiana*, *Acacia* sp., *Asparagus officinalis* [Thailand]  
*\*Echinothrips americanus* MORGAN  
*Capsicum annuum* [Netherland]  
*\*Florithrips dilutus* HOOD  
*Anigozanthos* sp. [Zimbabwe]  
*\*Frankliniella australis* MORGAN  
*Rubus* sp. [Chile]  
*\*Frankliniella fallaciosa* PRIESNER  
*Rubus* sp. [Mexico]  
*\*Frankliniella gossypiana* HOOD  
*Asparagus officinalis* [Mexico]  
*\*Frankliniella tritici* (FITCH)  
*Vaccinium* sp. [U.S.A.]  
*\*Frankliniella williamsi* HOOD  
*Asparagus officinalis* [Mexico], *Coriandrum sativa* [Thailand], *Zea mays* [Australia, U.S.A.]  
*Frankliniella* sp. 1  
*Dianthus* sp. [Colombia], *Rosa* sp. [Equador]  
**Comments.** The specimens examined run to *F. panamensis* HOOD by key of MOUND and MARULLO (1996: 120) but the some specimens are often intermediate characteristics between *F. panamensis* and *F. occidentalis*, and are indistinguished from the latter species.  
*Frankliniella* sp. 2  
*Vaccinium* sp. [U.S.A.]  
**Comments.** It is very similar to *\*F. bispinosa* MORGAN by having enlarged dorsal surface at

- apex with a pair of stout setae on antennal segment II and segment III with a distinct annular swelling on the pedicel, but the specimens examined are shrunk at intermediate of the antennal segment III. These two species are distinguished by proportion of the antennal segment III.  
*Frankliniella* sp. 3  
*Psidium guajava*, *Rubus* sp. [Mexico]  
**Comments.** The specimens examined run to *\*F. fulvipennis* MOULTON by key of MOUND and MARULLO (1996: 120) but differ from the latter species by having the legs with almost dark.  
*\*Glaucothrips glaucus* (BAGNALL)  
*Berzelia* sp., *Erica* sp., *Ischyrolepis* sp., *Leucospermum* sp., *Phyllica* sp., *Protea* sp. [South Africa]
