※ Precautions
1. Precautions in usage
Although we aim to provide accurate quarantine condition information here, in some cases, it may differ slightly from the actual conditions, because importing countries may change their regulations at any time. We recommend that you confirm the latest import conditions of importing countries through concerned parties such as local importers, or contact to the embassy of importing country in Japan before exporting.
Conditions in this table are merely the plant quarantine requirements of each country, and in some cases there may be import restrictions based on other regulations of the country or CITES, even if those items can be exported according to this table.
2. Import permit systems in importing countries
For contact and procedures regarding an import permit of an importing country, inquire of the national plant protection organisation or agricultural authority of the importing country through concerned parties such as local importers, or the embassy of importing country in Japan.
